1.Introduction

Our team prodly presents it's first erotic game for mobile phone: **Oskar and the Collegegirls**.

In this erotic game you will be able to control the young administrator of the Fumeck College: Oskar. Your job is to make „order” in the girls room.

They are so hot, that your best strategy to make silence, is to sleep with them. But you must be very careful, because sometimes Judy (an old woman), your boss, will come into the room to see, if you are doing your job or not...

2.1.Starting the game

To start the game you must enter in the Games¹ folder, then select *Oskar and the Collegegirls* and press Fire. At the begining of this game you will see the loading screen, here you must wait until the progressbar will be full.

This will take a few seconds. Be patient!

¹ On some phones instead of the Games folder you will find the game in the Applications folder.

2.2.Menu

When the loading has finished, you will enter into the menuescreen.

The menu has 7 options:

- a) Continue (active when a game is started) – you can continue a game
- b) New Game – here you can start a new game
- c) Settings – enter here to set your needs for sound and language
- d) Highscores – you can look at the best five player's scores
- e) Help – a short description about the game and about the control
- f) About – about the author
- g) Exit – to exit from the game you should press this

2.3.How to play?

Fisrt you need to start a new or continue a saved game. Next screen will be appear when you start a game:

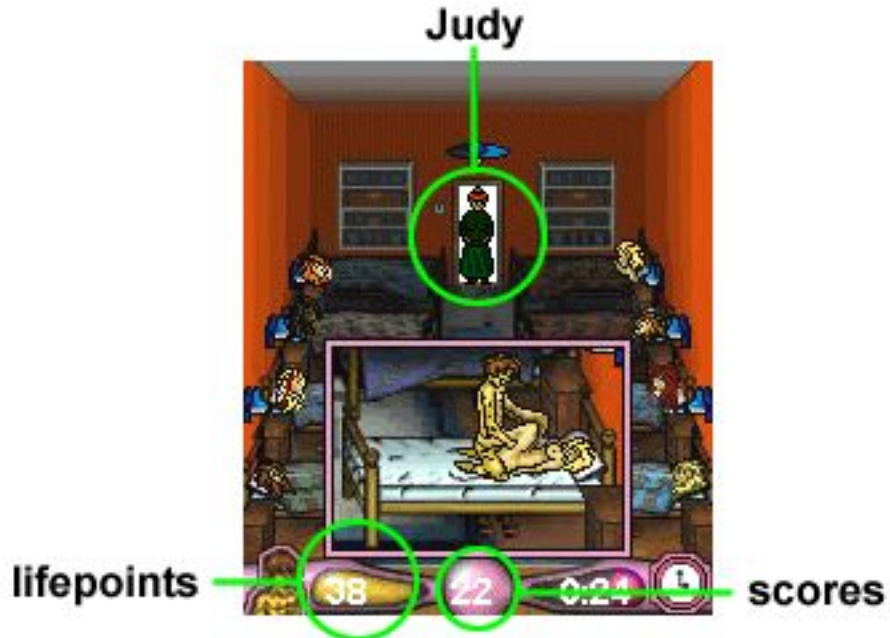

In the middle of the room you can see Oskar, he is waiting for your movement. Girls are lieing over the beds, but they can't sleep well. Sometimes they are moving their heads, and that is the moment, when you must give your best.

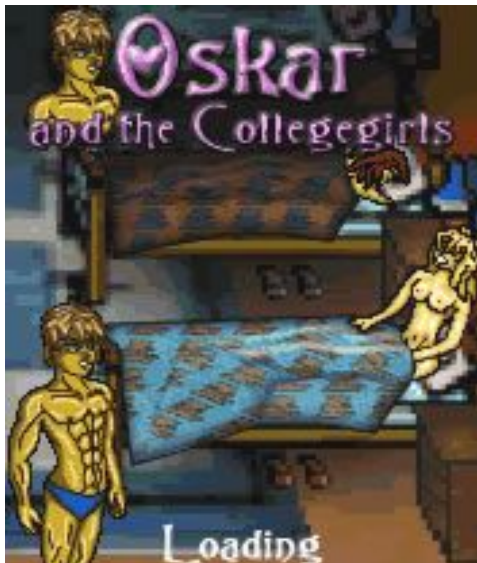

Press the 1, 4, 7, * or 3, 6, 9, # keys, to make love with the girls. Next image will show you, what is the meaning of the keys:

You must be careful with your boss (Judy), because time to time she will come into the room. If she will see you, that you are sleeping with a girl, your scores and your lifepoints will reduced, as you can see on the next image:
